Subject: Wyoming RH - A couple of things

Carl –

We all hope you are doing better! We have a couple of things we wanted to check on. I know Aaron brought up the issue of existing controls and that it is not part of the current briefing. If you plan on mentioning it, we would ask that there not be a discussion on it today and that we simply say OGC/ORC are working on crafting a response and that if we need to have a separate call next week to discuss we will. Also, have you made a decision on whether we are going to include a discussion of also using an ammonia level of 0.05 in western Wyoming (in addition to the monthly variable) and how that would not have changed our decision? Lastly, All of the sections are (except for modeling) are ready for yours and Callie's review. You still need to register in max.gov and let me know so I can add you. The sections (except for modeling) have also been released to OAQPS/OGC for their review.
